TIMES-VIRGINIAN

In the Heart of Virginia's Dark Tobacco Belt

Appomattox, Virginia

ESTABLISHED 1892

Mr. and Mrs. Calvin Robinson ..... *Editors and Publishers*

Entered as second-class matter at the Post Office at Appomattox, Virginia, under Act of Congress of March 3, 1879.

Address all correspondence to the Times-Virginian, Appomattox, Va. Subscription rate: $2 a year, payable in advance. Single copy 5c. National advertising representative: Weekly Newspaper Representatives, Inc., 920 Broadway, New York City. Advertising rates upon request.

CUT OFF UNTIL OCTOBER

One hundred and sixty-six men are being left in the Anartic until next October by Admiral Richard E. Byrd's South Pole expedition.

The ships of Admiral's Byrd's fifth expedition to the South Pole are now leaving, and soon only 166 of the original men sent on the expedition will be braving the darknessand extreme cold of the Anartic.

These men are to make preparations for scientists, who will arrive in 1957, and who are expected to make important progress, in the scientific field, in the study of weather, cosmic rays and other phenomena, such as magnetic fields.

The 166 men are actually completing construction of a base for U. S. personnel, which includes more than thirty buildings, and which will house scientists and other Americans, in the years to come. They will be isolated until October when ships can again get through.

ON NEWSPAPER ADVERTISING

After all the revolutionary changes which have taken place in the advertising world in the last ten years, the newspaper—it is now proven— remains the best medium of advertising.

The newspapers are the only advertising medium that can guarantee their circulation figures. Newspapers have submitted to various auditing bureau methods, which can easily be checked by any prospective advertiser, and their circulation is well known.

Moreover each newspaper printed is bought by someone, and something that is bought is wanted, and, therefore, read.

Moreover, the newspaper is a permanent record. It is not stretching the facts that the average newspaper is read by perhaps a dozen persons. You can safely multiply known actual circulation by at least five persons to reach a readership figure.

In spite of all the competition from new media, newspaper advertising continues to grow and the public continues to express its confidence in newspapers to an amazang degree.

The newspaper is still champion, and we know of no purchase you can make and get greater value received.

USE YOUR BRAIN

Dr. Wilma Donahue, University of Michigan psychologist, says the modern generation of young people is not required to do enough thinking. Dr. Donahue is firmly convinced that the older generation, in its school days, was forced to do more thinking.

The brain deteriorates, just as do muscles, if not used, Dr. Donahue points out, and, therefore, it is essential for those who hope to remain alert mentally to practice proper exercise in thinking.

The question which arises next, for most of us, is how to keep our mental processes alert. It might be done by reading a thought-provoking book, if one is in a job which requires little thought, or in a professional rut. It can also be done by facing new situations, or hobbies, which require thought and the overcoming of difficult situations.

We suggest that it is a good habit to read at least one good book a month, and that is also a worthwhile goal to seek out new and challenging tasks, avocations and interests.

TO BE THE BIG ISSUE

Early last week there came to our desk a document from the Democratic Party chiefs listing what they believed would be the "Ten Big Issues" in the approaching Presidential campaign. That was before the announcement that Mr. Eisenhower would be available for a second term bid. We are confident that the campaign will see a full presentation of all cogent issues, especially the farm issue. But, it is our opinion that the health of the President will be the number one issue to be decided by the voters in November.

THREE MILLION IN COLLEGES

The extent to which this country is growing is shown dramatically in the steady increase in college enrollment. It is estimated that there are, for the first time in our history, three million students now enrolled in institutions of higher learning in the United States.

Commissioner Samuel M. Brownell, of the Office of Education, reports that the increase this year represents an 8.8 per cent rise over the previous year. It is interesting to note that the increase in enrollment in publicly-controlled universities and colleges is greater than that of privately controlled institutions. The increase in the former was 9.7 per cent, while that of the later was 7.7 per cent.

The United States now has approximately 1,850 colleges and universities. Male students out-number female students in these colleges by almost two to one.

The University of California has the largest enrollment: 38,594. It is followed by State University of New York with 33,623; New York University, 31,867; City College of New York, 26,426; Columbia University, 25,887; University of Illinois, 24,129; University of Michigan, 23,765; University of Minnesota, 23,393; Ohio State University, 21,744, and the University of Wisconsin, 20,119.

* * * * * * * * *

The world is a great thing when you realize all the odd-looking couples you see on the street are made up of individuals who think their sweetie is quite a charmer.

* * * * * * * * *

One thing about the democratic form of government: If you dislike the men in office, you can run for their jobs.

Representative Abbitt And The Governorship

(An Editorial in the Progress-Index., Petersburg, Va., Feb. 14)

A staff writer of the Lynchburg NEWS reports it is the feeling of many members of the General Assembly that Attorney General J. Lindsay Almond, Jr, will be the Democratic candidate for governor in next year's election and that State Senator Ted Dalton of Radford will be the Republican bearer.

Among the others the writer describes as "widely mentioned as possible candidates" are Delegate Robert Whitehead, State Senator Harry F. Byrd, Jr., State Senator Charles R. Fenwick, State Senator Garland Gray, State Seator Albertus S. Harrison, Jr., House Speaker E. Blackburn Moore, Lt. Gov. A. E. S. Stephens, and State Senator Harry Carter Stuart.

"What is considered by many to be a really big question mark in the picture as a whole," reports THE NEWS writer, "is whether Congressman Watkins M. Abbitt of Appomattox would be interested in entering the race next year or will stand aside for the time being.

"Long regarded as one of the organization stalwarts, Abbitt has been called in by the organization on more than one occasion when seemingly insurmountable difficulties confronted it. The feeling is that Abbitt's value to the party and the organization will have to be taken into account in choosing a candidate."

The story goes on to say that Mr. Almond is generally conceded to be in a first rate position to "get the nod" for the gubernatorial contest, but that Mr. Abbitt could put the organization in something of a spot should he evidence a desire to get into next year's contest.

The article does not profess to know whether the Fourth District representative is interested in making the race nert year or not, but it is written on the assumption that he has earned the right to organization support for the governorship at some time in the future, and in the not too distant future.

Such speculation is a matter of much interest to his contstituents. The leading position to which he has attained in the Virginia delegation and in Virginia politics, and in a span of a few years, puts this well above the level of idle speculation.

CONTRIBUTED BY READER

(Editor's note: The following contribution to our columns has been on our desk for some weeks. It is from a local reader).

A new Handbag!

From the outside,
I'm sure you would never guess,
That on the inside, is
the same old mess.

Fifty Years Ago, And Now

We have read the stories of our country's pioneers,
Rejoiced with them in their pleasures,
And sympathized with them in their fears;
Truly, they came to America where they could worship God,
Freely, and without the tension of earthly kings and the rod:

Fifty years ago, we were not really on the modern brink,
When we stop to think:
Our grandparents took long journeys in covered wagons.
Drawn by steads, spirited like fiery dragons:
They rose in the early hours of morn;
Served their breakfast, and by lantern light
Performed their chores, before the break of dawn;
(You see, that was years before Thomas Editon's day
And the pioneers didn't have light the modern way.)
Then to the fields they went, where they toiled early and late,
The unimproved soil to cultivate;
They really made history to relate,
As they strove their ambitions to compensate.
Each year, when harvesting time was over they set aside a day,
To give thanks to God, in a most grateful way;
Truly they feasted lavishly, but They didn't forget to pray.
Therefore until this age, the occasion is "Thanksgiving Day."
One morning I went walking with a young man from the city.
He was indeed, quite handsome, and engaging in witty;
On approaching a mud hole, I remarked, "We should have a pole."
"Pardon me," said he, "I should have an automobile."
Automobile! Did you say automobile?"
Pardon my quiz, but, what in the world is an automobile?
"A horseless conveyance of travel," he calmly replied.

Puzzled was I, as I strode
his side.
"Yes, I know," said I, tha
The man drawn jinrikish
of travel by the fina
"Not that," said he, "bu
named Henry Ford
ed a machine
"Which will travel by po
gasoline."
Now gasoline too, was
new.
But Time raced on, and
automation.
This has brought to us
ful surprises and pr
formation.
Fifty years ago, we trav
tances by steam dr
Now in this modern day,
take the plane.
The present generation
realize,
Nor, can they dramatize,
All the changes which h
wrought,
By skillful engineers,
Within these Fifty Years

Are All Cold Remedies Alike?

No! For example, 666 is the activity medicine, which combines of the most effective, widely scribed drugs known, to relieve cold miseries sooner. 666 is also potent and gives positive, dependable rapid relief from miseries of the symptoms of colds. That's why 666 is the most passed in effectiveness. Try it.

No other cold remedy can match 666 liquid or 666 Cold Tablets.

666

with a modern **ELECTRIC WATER HEATER**

When you set your washer to HOT, you can count on your Electric Water Heater to deliver the piping hot water for snowy sheets and table linen. And it's the same story all over the house, from sink to shower bath. If a faucet's labeled "hot"—your Electric Water Heater never makes it fib.

You needn't give it a thought, because your Electric Water Heater is completely automatic. Day after day, year after year, it gives you hot water without asking the slightest attention. And you never need think of cost, either. Electricity heats water for pennies a day—and it's especially cheap with a thrifty off-peak meter to watch your budget.

Fits anywhere from basement to attic. With an Electric Water Heater, you choose the most convenient location—without worrying about chimneys or vents. Uprights tuck away in any odd corner with the least possible floor space. Table-top models match your all-electric kitchen and give added work surface—without overheating the kitchen in summer. Take your pick at your electric appliance dealer's—and enjoy clean, thrifty, dependable hot water *electrically.*

Jesus on History

Lesson for March 11, 1956

ALF way through a movie
ou may see people getting
and walking out. That does not
ssarily mean they are dis-
with the picture. It's just
y came in right there in
first scene. "This is where we
in," they say, and they don't
to see the second half of the
twice. (Query, by the way:
a movie, or a
that isn't
th seeing or
ding twice.
seeing at
In ancient
learned
thought
history was
motion pic-
shown over
over again. Dr. Foreman
lived long enough he
see history repeat itself,
thought. The diagram which
Greek mind best represent-
history would be a circle. Fly,
man, going around in cir-
will never get anywhere. His-
the Greeks thought, is like
waves, but it never gets
where.

ory Does Somewhere

Luke's view of history is a
ent one. History is more like
straight line than a circle.
ight!) line is too simple. If
will read the book of Judges
he Old Testament you will find
e of history that goes uphill
down in dizzy succession. But
ked or straight, it is a line
somewhere. On a circle, you
a given point. Now, after you
passed that point, are you
ng farther away from it as
move, or are you getting near-
The answer is both, of course.
f history is a kind of cir-
then if you ask the question:
we getting farther away from
arism, is the world getting
er at all? The answer will
to be: It doesn't make any
rence. We are farther from
period of barbarism through
h we last passed; but we are
ng closer to the next period
barbarism. History, bad and
will repeat itself.
the Bible, and Jesus espe-
, have a different view. The
d is moving away from a
that will never happen again.
moving, we are moving, to-
a future that has not yet
ened and will happen only
the course of history is not
a top airplane that buzzes
nd and around, captive on a
, but like a real plane that
s swiftly to its distant port.

ory Keeps Going

man history will have an
so far as this earth is con-
ed, some day. (Of course no
an being's final destiny would
nded even if the whole human
were destroyed by H-bombs.
we are talking about history
the green planet.) But it is a
ked, as Jesus pointed out, to
to the conclusion that we
living in history's last chap-
"The end will not be at once,"
said. Many times men and
men have been sure they knew
end of the world was at hand;
they have always been mis-
n. There is a theological sem-
y which was built by contri-
ns from the churches which
erves. But there were some
ches back when the seminary
built, that would not con-
de. The end of the world is
close, they said, to be wast-
money on brick buildings. It is
wise to refuse to build for
rrow, for it is never wise to
ume there isn't going to be a
rrow. History is going some-
re; but it will not reach its
mation "in nothing flat."

Goal of History

Then is history going? The
wer is: Toward the
n of the Lord Jesus over all
kind. Jesus taught his disci-
to look forward to one event
all others: his coming
n. Now the Christian church
s exciting times has had vari-
ideas about how and when
ist's Coming will be, and what
ill mean in detail. But surely
Christian can accept seriously
idea that history just goes
and on, a line that has no di-
tion and no end. God and
e are in conflict; must we be-
e that this war will never end?
the contrary, Christians are
ted in believing that what
ist backs us hope for will come
, and indeed many Christians
ieve that it is beginning to come
e now; namely, that God in his
e time will bring our time to
end, that soon or late as we
ant it, but surely, the Son of
n in power and glory, will be
d of all.

Painting Tips

Here is some of the know-how from paint manufacturers and professional painters for making your paint jobs easier and much more satisfying.

Painting your own rooms can be one of the most satisfying jobs you can undertake. The basic points to remember are: (1) Use quality paint and equipment. (2) Make sure the surface to be painted is smooth, clean and dry. (3) Do the painting in a warm, dry, well - ventilated room. (4) Always allow plenty of drying time between coats.

In addition to the basic rules, there are many tips and tricks of the trade that will make your painting job a durable and handsome one. Here are a few of them:

Tips on Mixing Paint

Mix the total amount of paint required for the room, plus an extra quart so you may do retouch work later without rematching the paint.

For best mixing, pour paint back and forth from one can to another. This is called "boxing." First pour the liquid from the top of a newly-opened can into another container. Then stir in the remaining solid matter until it becomes smooth paste. Slowly replace liquid, stirring constantly. Then pour the paint back and forth from one can to another several times or until pigment is completely blended with it. Stir paint occasionally while using it. A paddle with holes in it does a better mixing job than a solid paddle.

Be careful with thinner. Read the directions on the label and use only the exact quantity of thinner recommended.

Always start a new can of paint from a corner, never in the middle of a wall or ceiling — even the same color from different cans sometimes varies a fraction in hue.

Tips on Brushes and Rollers

Buy good paint brushes. Select a 3 or 4 inch brush for interior walls and ceilings; select a 2 or 2½ inch brush for casings, doors, and baseboards; choose a 1 or½ inch brush or 2 inch sash brush for windows.

Prepare a new brush for oil-painting by soaking the bristles thoroughly in linseed oil for at least 12 hours. Before putting it in paint squeeze out all the oil you can.

When buying a roller, be sure to get the correct type cover; mohair (short nap) for rubber - base latex paints, and oil paints.

Always follow the manufacturer's directions on how to use a specific roller.

Tips on Applying the Paint

Before painting, remove hardware; take off switch and wall outlet plates and lower or remove ceiling fixtures.

Dip the brush carefully, never allowing more than half the length of the bristles to enter the paint.

Tap off paint drippings against the side of the can. Don't draw the brush edgewise across the top of the can.

After you have dipped the brush, do not wipe the paint from the sides of the brush, for about 35 per cent of the paint is carried on the outside of the brush.

When painting walls, with brush or roller, begin at the top and in a corner and work down. Carry each stretch being painted down to baseboard. Keep area narrow so you are always working with a wet edge.

Use curving and down strokes, called "fanning." This stroke is less tiresome than others. Make the edges of strips irregular and slightly slanted rather than straight up and down. This will help make laps less apparent.

Always apply paint with the flat side of the brush. This applies even when painting a narrow strip on a window frame. Painting with edge of brush makes it divide into clumps and does a poor job.

Modern Mary

At the supper table one night on the farm, the hired man was telling about a breeder who was developing a strain of sheep for speed. "He tells me," the hired man said, "that he's got lambs now tha.. run 40 miles an hour."

"But why does he want lambs that can run 40 miles an hour?" asked the bright young girl.

"To keep up with Mary," he replied.

Ford Wins at Stock Car Racing "Olympics"

HERE'S FORD'S RECORD AT NASCAR'S DAYTONA BEACH NATIONAL SPEED WEEKS

FIRST in Sports Car Acceleration

A Ford Thunderbird set a new record for American production sports cars, sprinting a measured mile from a standing start in only 40.5 seconds—reaching a top speed of nearly 150 mph!

FIRST in top speed—class 4

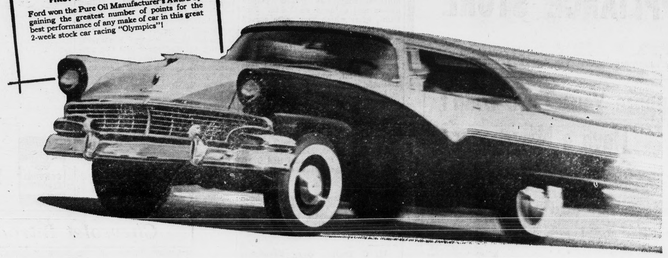
A Ford "Six" took top honors in the Flying Mile for Class 4 American production passenger cars!

FIRST in 160-mile Convertible race

Ford V-8's took 1st and 2nd place in the National Convertible Championship Race. Ford not only won over all cars entered, but it also topped the all-time record for the Grand National Championship Race.

FIRST in over-all performance

Ford won the Pure Oil Manufacturer's Award by gaining the greatest number of points for the best performance of any make of car in this great 2-week stock car racing "Olympics"!



The Ford V-8 again showed its taillight to all competitors in the "Olympics" of stock car racing at Daytona Beach, Florida.

In blazing across the finish line Ford demonstrated once more the sizzling performance that keeps it the largest-selling V-8 in the world. No other car in the field could match Ford for getaway "git" . . . for straightaway acceleration . . . for all-around roadability. To see exactly how the other cars trailed behind Ford, see the chart at the top of this page.

One of the secrets of Ford's performance is the tremendous torque (wheel turning power) developed by Ford engines. For example, Ford's new 225-h.p. Thunderbird Special V-8 engine develops more torque than any other engine in the low-price field. This means quicker response, smoother running in the kind of driving you do. Just a gentle nudge of Ford's accelerator and *whoosh!* You pass in instants when instants count!

Ford now offers this mighty 225-h.p. engine with any Ford Fairlane or Station Wagon model with Fordomatic. What's more, these engines are coming off the assembly lines right now! So why wait? Come in today for a Test Drive. Find out for yourself about Ford's exciting *performance*. Find out why Ford is the V-8 with the world's biggest following!

FORD

World's largest-selling
